

AUNG KHANT PAING

MOBILE APPLICATION ENGINEER

Flutter / Dart / Clean Architecture / Android / IOS

Profile

Mobile Application Engineer with 3 years of hands-on experience in building cross-platform apps using Flutter and Dart. Currently leading a development team of 4/5 developer at a growing tech company, overseeing full project lifecycles and mentoring junior developers. Adept at collaborating with vendors, stakeholders, and cross-functional teams to deliver high-impact applications. Proven track record in real-time streaming, API integration, and clean architecture across domains such as e-commerce, entertainment, and AI. Passionate about building scalable, user-focused mobile experiences.

Experience

Mobile Application Engineer (Team Lead)

Alpha X, Yangon || 2022 - current

A team of 4-5 developers is being led, with responsibilities including task distribution, code review, and key technical decision-making throughout the development process. Junior developers are being mentored to support their growth and ensure effective integration into the team workflow.

- **Mahar Music:** Spearheaded the development of a full-featured music streaming app with real-time streaming, offline mode, and personalized playlists. Boosted user retention by 45%.
- **Shwe Ohh:** Led the build of a pharmacy e-commerce app using Google Maps and QR scanning, improving local discovery and increasing engagement by 30%.
- **AchieversProfile:** Developed a motion & object detection app using machine learning and integrated secure payments with Stripe, enhancing detection accuracy by 40%.
- **Movie & Music Streaming App:** Integrated complex OData API requirements with optimized query filters, improving performance by 25%.
- **New Movie Streaming App:** Led the development of a full-featured streaming platform for movies, managing timelines, vendor coordination, and quality assurance across both Android and iOS.
